2. Can the City of Pensacola please provide clarification to the level of review needed for 'peer review of capital projects and specifications'? I.e., what certifications are required?
 - A. No special certifications are required. This is just a simple process where we'd like another professional engineer(s) to serve as a second set of eyes to review plans/specs that are produced in-house or possibly by another engineering firm. Basically, review the documents and provide comments.
